

School Cleaning Fall News Letter
Henry Johnson Charter School
Prepared by Martinez Cleaning

During the summertime, we cleaned the entire school by disinfecting all areas. We cleaned each of the floors by stripping the floor and applying several coats of wax. We cleaned all of the carpets with a two-step systems, first with the Cimez machine, and second with carpet washing machine.

We deeply cleaned all areas of the bathrooms as well as all areas of each classroom. We also disinfect windowsills, desks, sinks, countertops, and chairs. All surfaces are thoroughly cleaned and sanitized each night. We cleaned all entrances to the school with CDC required disinfectants.

Come this fall when school resumes, we plan to have adequate staff on hand during the day to be able to help each classroom as needed. Our team will clean and disinfect every classroom once the kids leave. Throughout the day, our staff will thoroughly clean each bathroom before and after each class. Our staff will clean the cafeteria before other students can use the cafeteria, the same thing with the gym. We will disinfect the gym before a new group comes in each day.

We will be doing a level four cleaning each night to disinfect the entire school from any contamination; we plan to spray the whole school with a water base disinfectant after our regular rigorous cleaning. This will help ensure that all surfaces and all areas are disinfecting before the next school day. This fumigation will take place every evening while the building is empty. This is to help us get any area that we possibly could have missed. We will follow all CDC requirements as well as what the school wants us to do to meet the requirement set by the board of education. Please view the images below to see the type of fumigation machine we will be using at the school.

All our staff will wear masks and gloves at all times. They will also wash their hands frequently. We have ongoing training for our staff to make sure they are up to date on all recent cleaning tools, ideas, and principles to stay on top of the new normal.

“We plan to thoroughly clean and disinfect all areas of the school - All surfaces; everywhere that someone could possibly touch.”

-Labbie Rabiou CEO of Martinez Cleaning

Kills 99.9% of Bacteria, Viruses*, Fungi & Molds
 Kills Norovirus in Just 4 Minutes
 Eliminates 99.9% of most Allergens[§]
